SUMMARY

Outcome driven Front End Developer dedicated to leveraging my technical, analytical problem-solving skills to create dynamic websites and web applications. Experienced in building clean, cutting-edge applications that are intuitive and user-friendly for all users.

SKILLS

Frontend: Javascript ES6, HTML (HTML5), CSS (CSS3), SASS, Bootstrap, React | **Backend:** Node.js, C#, MongoDB, GraphQL, MySQL, Sequelize ORM, REST APIs, OAuth | **Design:** Adobe XD, Figma, Sketch, Illustrator, After Effects, DBDiagram

EDUCATION

Bachelor of Science in Web Design & Development
Full Sail University • Winterpark, FL • 2022

CERTIFICATIONS

J.P. Morgan Software Engineering Virtual Experience Program Participant

Forage • 20222

• Interface with a stock price data feed • Use JPMorgan Chase frameworks and tools • Display data visually for traders

Skyscanner Front-End Software Engineering Virtual Experience Program Participant

Forage • 2022

• Create a Backpack React Web App

PROJECTS

Ontrac Fitness Tracker

April 2022 – May 2022

- Developed RESTful API with backend tools such as Node and Express, and consumed on the frontend.
- Researched, designed, and developed UI mock-ups, wireframes, and a prototype using Adobe XD and illustrator following a user-centered design approach.
- Created and implemented MySQL relational database for storing data across user-defined entities.
- Implemented authorization by using JSON web tokens and hashed all user passwords to enhance security and reduce risk.
- Utilized Github for agile project management and version control of codebase across multiple development environments.

Headliner App

December 2021 – January 2022

- Built reusable semantic React components that comply with web accessibility guidelines, resulting in cleaner code and improved readability for future developers and facilitating future scalability.
- Integrated TicketMaster API allowing users to streamline search processes by entering the city or artist information.
- Optimized SEO and accessibility by implementing fully responsive/mobile-first design of all pages for a wide variety of web clients.
- Ensured optimal performance, quality, and responsiveness of application by identifying bugs and troubleshooting problems.

WORK EXPERIENCE

Production Associate

Plexus Corp.

July 2018 – October 2020, Nampa, ID

- Leveraged analytical problem solving and thinking when troubleshooting equipment, process flow, and systems to eliminate client delivery date interruptions.
- Oversaw ERSA machine soldering operation to ensure product quality in accordance with global aerospace standards and cost efficiency.
- Collaborated with 3 other employees across 3 departments to strategize on-time delivery of products for successful Space X Starlink launches.
- Trained and mentored new production associates resulting in increased effective work habits and QA standards of excellence.
- Maintained work environment by adapting to and overcoming a plethora of challenges, including new product rollouts and daily machine malfunctions.

Third Class Petty Officer

U.S. Navy

August 2013 – August 2017, Virginia Beach, VA

- Proactively communicated with Chief Operating Officer to ensure all operations functions were being followed up daily, including oversight of field operations and team building.
- Reduced craft and equipment downtime by 15% through effective troubleshooting and maintenance, resulting in faster repair times and greater efficiency.
- Oversaw logistical and operational support to deploying organizations, ensuring that all supplies and equipment were in place prior to departure.
- Identified ways to improve maintenance processes, streamlining the training and deployment of military personnel.
