EDUCATION

Bachelor of Science in Web Design & Development
Full Sail University · Winterpark, FL

SKILLS

Programming Languages: Javascript ES6, C#

Frontend: React JS, CSS (CSS3), Sass, HTML (HTML5), Bootstrap, Material UI, Responsive Design

Backend: Node JS, Express, MySQL, PostgresSQL, MongoDB, GraphQL, Sequelize ORM, REST APIs

Other: Git, Npm, Adobe XD, Figma, Illustrator, After Effects, Agile Development

CERTIFICATIONS

J.P. Morgan Software Engineering Virtual Experience Program Participant
Forage · 2022
· Interfaced with a stock price data feed · Used JPMorgan Chase frameworks and tools · Displayed data visually for traders

Skyscanner Front-End Software Engineering Virtual Experience Program Participant
Forage · 2022
· Created a Backpack React Web App

PROJECTS

Ontrac Fitness Tracker
April 2022 - May 2022
· Developed and documented RESTful API with Node.js, integrating with MySQL relational database and consuming data on React built frontend.
· Designed wireframes, prototypes, and UI assets using Adobe XD and Illustrator, following a user-centered design approach to ensure accessible usability and web standards.
· Implemented backend user authorization by using JSON web tokens and hashed password resulting in increased application security and reduced risk.
· Utilized Github workflow and Trello for agile project management and codebase version control across multiple development environments.

Headliner App
December 2021 - January 2022
· Translated designs into reusable, semantic React JS components that complied with best practices, ensuring consistent reusability.
· Integrated TicketMaster REST API allowing users to streamline search processes by entering the city or artist information.
· Developed responsive/mobile-first design for all pages resulting in optimized SEO and accessibility.
· Ensured optimal performance, quality, and responsiveness of application by identifying bugs and troubleshooting problems.

WORK HISTORY

Production Associate
Plexus Corp.   July 2018 - October 2020, Nampa, ID
· Strategized with suppliers and other departments to implement product process improvements and streamline operations as a result of machine and process errors, decreasing corrective action reports by 50 percent.
· Adapted to and overcame issues in a fast-paced setting, including working amidst constant machine malfunctions and implementing new product rollouts.
· Partnered with team of 4 to collaborate and ensure on-time delivery of more than 1000 products for client, turning around average time between order placement and shipment from 33 days to under 21.
· Mentored more than 20 associates over a 6 month period, increasing effective work-habits and QA standards of excellence.

Third Class Petty Officer
U.S. Navy   August 2013 - August 2017, Virginia Beach, VA
· Established a positive supportive culture within a team of 20 junior sailors by planning and implementing weekly team-building and collaboration exercises.
· Managed new sailors training over a 2 year period and offered continuous advice, guidance and mentorship of duties.
· Oversaw logistical and operational support to deploying organizations resulting in an increase in mission readiness by more than 25%.
· Developed methods to increase overall efficiency of maintenance operations, reducing costs and streamlining deployment of military personnel.
· Reduced craft and equipment downtime by 15% through effective troubleshooting and communication, resulting in faster repair times and greater efficiency.
